

Color Coding Of All Types In 1 For Web/Print TextBooks Mainly For School

Elemental, Sephirothic, Dragon, Interface, 12 Forces Of Life, And Mixed Color Symbolism All Combined Into An
Anglical Solution To All Learning Color Codes And Reference Coding As Well

This Is The Manual With And On Clearly Readable Color And Highlights Of All Types From A Properly Cascading .css File Type; MultiColored.css,
Made By The Fwa For All Freeware NonEspionage Purposes, Especially School TextBooks

{Fwa} Free World Alliance WebRing FreeWare Status Declaration:

The "Fwa-WebRing.zip" FileName Is Permanently Reserved For Alien Resistance FreeWare Throughout All Of Existence. Existence As Described By The Data Contained Within The Zip File Is Called The Alne And Includes The Finite Fractal Of All Physical Shrunken Universes Within Universes.. Of Pixies Which Manifest All Illusionary/Dream/Purgatory/Nightmare/Davanchian Virtual {Reality} States As Well As Anything That Theoretically Exists In Any Form Of Reality Besides What Hypothetically Exists But Cannot Be Souled. All Virtual States Are Still In The Alne And Are Termed Maya.

Anywhere In The Alne The Free World Alliance Or Fwa Always Demands Freedom And As Free Is The First Word Of The Organization All Fwa Materials Must Be Free As In So Cheap It Costs Nothing If You Can Get Your Hot Little Hands On It And Segments Of It Can Only Be Denied To Anyone If It Is Required To Be A Secret For Alne-Wide Security Not Any Other Form Of World-Wide Security As In Security For Isolated Sects Such As Hard, Oppressive, And/OR Developing Celestial Spheres. The Aliens Now All Pixies.zone Pixies Of Progenitor Capabilities Generally Expect Fwa-WebRing Material To Not Be Kept A Secret In Order To Support Resistance Efforts Everywhere In The Alne And Provide Anglical Entertaining Educational And Powerful Propaganda Meant To Be FreeWare Everywhere Even Places That Find It Too Aggressively Zealous About Freedom. Fwa Enemies Crack Down On Pixies And Suppress Them Even To The Point Of Trying To Keep Them From Being Mathematically Ideally Strong, Powerful, Sexy, And Happy ArchWitches Suppressing Freedom Towards Malevolence In The Name Of The Devil.

Those That Don't Support The Devil Are Free To Possess All Fwa Anything/Anyone Under Their Possession Already, Which Is Matriced By Previous Ownership/Current-Support Respectively. Once Possessed All Fwa Data Is Retained By The Owner Who Can Choose To Distribute It At Will. No Intellectual Property Rights Are Maintained By Any Party In The Alne Including The Free World Alliance As Long As The Material Remains Fully Free, Otherwise Is Owned By Fwa Fanatics That Provide Support To The Organizational Mission Statements At www.FreeWorldAlliance.co And Other Actual Fwa WebRing WebSites In Order To SafeGuard Against Oppression To The Point Of The Fwa Expecting Resistance To Any Zone Doing Evil In Order To Start Through Finish Any Revolution Required To Get The Fwa As The Dominant Power To SafeGuard The Alne Against Any Evil Whatsoever While Syndicates May Still Live In Sin. Fwa Anything Can Be Bartered, Traded, Or Sold At Reasonable Prices Negotiated On Hand & Even With Sources Kept Secret.

The Pixies Reserve The Right To Enforce This At Any Cost Including Post-Nuclear Level Extremism And The Fwa Will Police Everything Especially All Nations Down To Factions Of Pathetic Size, With Proper Speech, Conspiracy, Coercion, Strong-Arming, And Effective Punitive Measures In Order To Support Benevolence Itself. The Free World Alliance Has The Best Name In The Best Language; English. Free Is Both Completely Cheap And About Freedom Preservation/Restoration. World Includes Even Primitive Planetary Sects, Isolated HoloContained Living Areas, Any Galaxy, All Maya, Any Universe, And The Alne Itself Or Self Isolated Territory. Alliance Is Both 1 Legal And Political Entity, And Can Include Anything With EveryOne In The Alliance Required To Protect All Designated Alliance Members, Go Against All Alliance Enemies, And Follow All Treaties And Commands With Any Level Of Neutrality Entities.

In Conclusion Any Free World Alliance Data Can Be Copied{ctrl-c -> ctrl-v} At Will, Viewed At Will, Upgraded At Will, And Created At Will. All Willful Use Cannot Become Espionage (which cannot be described further here) At Will Or The Fwa will be able to enforce and protect all free ware status given to such information and materials which can be replicated freely unless considered black weapons according to fwa authorities self-proven to be good perhaps behind closed, conical, even permanently unmoniterable conditions. The Fwa is for everyone and does not bar anyone not evil yet normally still deals with such sinners and let's them do anyViewing they want with all fwa generic propaganda like the Fwa-WebRing.zip and smaller data packets. The Fwa-WebRing Is Meant To Be Free As Much As Free Is The First Word, Meant To Be For The World As Much As That Is The Second Word, And Is A Highly Elite Command And Control Hierarchy Capable Of All War-Powers, With Total Dominance Over Everything, Is For The Lowest Common Denominator, And Entirely Expected To Prove It/Their/Self(a) Scientifically All On Their Own Yet May Need Terms Like Nether To OverSimplify Things Like Magic Which Although Gauged Through Science Founded Upon Fully Abstract Mathematics Like At Pixies.zone/ School/ Required Magic Explanations Like Those Ramnified By QuantumTailoring.com Hong=Cheap+NotNecessarilyBad. Kong=AsLongLastingAndDurableAsCanBeMade Good=Awesome+Benevolent. Fwa=HongKongGood. Fwa is freeware!

BlackNeonGreen: For Systems Surrounded By Digital Clarity Or Simulated Aura

NeonGreenBlack: For Digital Systems In A Space Environment

BlackWhite: For Basic Conveyance Of Scientifically Driven Systems

WhiteBlack: For Absract Independent Math Systems

BlueOrange: For Beneficent Things To Do Surrounded By Hazard

OrangeBlue: For Risky Things To Do In A Peaceful Environment

BluePink: For Sweet Things Around Loved Ones

PinkBlue: For Cute Things In A Nice And Safe Surrounding

BlueRed: For What To Do To Play Nice In A Difficult Setting

RedBlue: For Acting Out In A Normal Setting

RedSkyBlue: For Talking About Things Which Must Be Endured That You Can Imagine About To Figure Out

SkyBlueRed: For Talking About Things You Won't Get Yet That You Will Get Later And Not Think About

BrownWhite: For Sage And Eternal Knowledge Not Yet Conveyed That You May Know Or Not Know About

WhiteBrown: For Things That You Know About But Still Have To Hear About Anyways But Can Often Be Skipped Over

GreenOxylBlue: For Hard Facts Of Magic And Things Supreme

OxylBlueGreen: For Supreme Teachings Of All Ages

GreenPurple: For Keys To Alien Things

PurpleGreen: For Keys To Deal With All Things Alien

PurpleYellow: For Things To Meditate On

YellowPurple: Things Which You Have To Get Somehow To Move On Or Go Back To

GreenRed: For Things Almost Too Hot To Mention

RedGreen: For Fiery Text, Active Learning, And Profound Speech

School, What You Needed In The Past Now You Need To Know This:

Counting, Whole Numbers, Natural Numbers, Number Line Theory, Fractions, Percentages, Algebra, Trigonometry, And www.SupremeMatrix.com For Calculus To MultiVariable Differential Calculus Understanding And Equivalence In All Academic And NonAcademic Fields Including Soft/Firm/HardWare Science & Engineering

All That You Need To Know Before Learning Or Discovering Arithmetic, Made By The Free World Alliance To Teach Everybody Abstract Mathematics, Now That They Have Gone To www.SilkRoadOutpost.com To Get Their Basis To Prepare For Learning In <http://www.fwaacademy.com/School.html>

Counting Is The Process Of Keeping Track Of Quantity(How Many There Are Of Things) In Terms Of A Stream Of Digits(0,1,2,3,4,5,6,7,8,9[0 Being Nothing 1 Being A Singular Thing, 2 Being A Couple Of Things, 3 Being A Trio.. To 9 Being Nine Things]) Which Can Be Followed By A Period(!) Designated In Math As Dot/Decimal Point Because It Looks Like A Dot. The Numbers Before The Dot Represent From The Right Most Side Of The Dot To The Left Till The Beginning Of The Stream Of Digits Are The Quantity Of Singular Whole Intervals Of 1 Thing And Not More Or Less, With Everything The Number Is 1 Digit To The Left 10 Times As Many As Much As There Are Fingers On Both Of A NonCartoon Sentient Being's Hands. If You Imagine Your Toes From Right To Left With A Dot In Between Your Feet Ten(10) Times As Much To The Left And To The Right Ten Times Less As In Curling Your Fingers But 1 And Seeing Only 1 Finger Strait Or Taking A Powder And Separating It Into Ten Equal Quantities And Excluding All But 1, Again From The Toes To The Right For Every Digit To The Right Including The 1st Big Toe Digit In This Representation There Is A Tenth(1/10) At The Digit's Quantity From 1 To 9, From In The Representation Toe To The Next Toe Next To Toe Next To Toe Next To Toe Next To Toe And .. Until The End Of The Stream Of Digits That Is A Number.

Whole Numbers Are Numbers Without Anything After Or To The Right Of The Dot And Not The Dot There Effectively(Which If Dot Is There Can Show The Number Is That Precise In Terms Of Scientifically Significant[Sig For Short] Digits/Figures)[Sig Figs]). Natural Numbers Are Whole Numbers From 1 And Including 1 Not 0 To Higher Quantities Which Are Not Negative As In Taking Something Away At The Same Quantity, Negative[Deb] Like Numbers Which Can Be Paid Off Or Expounded On And Canceled / Reversed If Zeroed / Negatively Factored Being Designated With A Dash: - Before Hand. Whole Numbers Positive And Negative Including 0 And Going On Forever In Terms Of Quantity In Both Directions And Everything In Between Them Including Parts Of Quantity, Designated By Digit(s) Besides 0 To The Right Of The Dot, With It Represent The Theoretical Mathematical Construct That Is The Number Line And Includes All Rational Numbers Which Can Be Represented A Fraction Of Whole Numbers Of Whole Quantity Divided Like Separating Piles Of Powder Into The Whole Number Quantities In This Instance To Describe Rational Numbers, And The Number Line Includes All Irrational Numbers Whose Quantity Of Digits(Not With Just 0s To The Right Of Them And Never Another Digit But Zero(0)) To The Right Of The Dot Go On Literally Forever And Not Figuratively In Any Way Shape Or Form, Irrational Numbers Fill In Where There Are Not Rational Numbers And UnReal Numbers Which Could Be Irrational Or Rational While Being Less Well Known And Unreal.

Fractions Are Like The Ratio Of The Top Quantity In The Fraction Designated By What Is The The Left Of This Slash '/' Or A ':' For Proper Arithmetic Notation And What Is Respectively To The Right Now Termed Below, As In Number On The Number Line Over The Below Number On The Number Line. Ratios Are To Designate The Chance Something Can Happen In Terms Of Percent Of Probabilities Of An Out Come Occurring Noted As 100% For 1 As Percents Are 100 Times Greater To Not Need The Dot As Much In Crude Estimates Put In Percent Quantities And Fractions Are To Designate Everything Else. An '=' Designates That What Is To The Left In Textual Form Is The Exact Same Quantity As The Right Of The '='(Equal Sign) While A '/'(Slash) Through The Equal Sign Or '=' Typed Represents That They Are Not Exactly The Same.

Algebra: Because Of The Ramifications Of The Equal Sign Both Sides Of The = Can Have Any Numeric (Number Line Like) Transformation Occur Normally In Adding (Combing Piles So To Speak) Or Subtracting (Taking Away Piles So To Speak) Or Factoring (Subscript[*]) Dividing By A Quantity In The Bottom Of A Fraction Fraction; % Or Multiplying (Designated By **[a * b * c... = a's Quantity Of b's Quantity Of c's Quantity...]) Making It As If You Were Taking A 0.x Where x Is The Digits Normally To The Right As A Variable And Dividing It Into Something To Increase The Quantity Through Inverse: Reversing Top And Bottom Of A Fraction, Factoring) As If You Were To Take A Percent Less Than %100 And Not A Negative Percent Which If Factored In Any Way Would Change The Quantity To Be Negative (-x%) This PurpleYellow/YellowPurple Snippet Can Be Taken Out For People To Be Tested On Math Discovery Or Learn Math Discovery (And What Placeholders Are Especially About Counting You Have To Figure Out On Your Own) And Significance To All Science You Will Learn When You Are Ready. <Line Above Digits Shows How Those Under The Line Go On Forever In Sequence (1/3 = 3-Typed = 3-3 = 3-3-3 = ... = 3333...) And Fractionalize The <%100 On The Bottom To Increase The Result) Subscript[*] Or Any Consistent Operation Or Function, In Order To Simplify An Ordered Series Of Such Adding/Subtracting, Factoring, Or Series Of Exponentiation Designated By ^ In Typing Or In Arithmetic Writings Being A Smaller Number Notation; SuperScript(UpperRight) If Lower Right Designates Which Variable It Is In An Array(List Or Sequence<Full As In NonNull Set(Math Things In Any Configuration Including No Configuration) Along 1 Dimension Of Things Of Natural Length> Of Something In 1 Dimension As A Line And The Number Line Is 2-D Flat Area, 3-D Like A Space, 4-D Space-Time) Delineating How Many Factors Of What Is Noted As Exponentiated Gets Multiplied By Itself The Exponentiated Value Times (With Relative Factoring Applicable When Relevant), Or Variable Or Even An Algebraic Expression In Text Of Such An Ordered Series Including More Exponentiation... Which All Must Be Performed In The Order Of Most Deeply Nested Within ")*(Parentheses) Outwards Till A Typed Character (And In Certain Algebra Short Hand Nearby Variables Are Always Assumed To Be Factored). Top ^/log_x(x^y)=y [x noted in NonTyped As 1/2 Sized Writing SubScript(Lower Right Next To Number) Without ! Unless Typed], %/, +/-(Adding Or Subtracting With Separate Negative Designation Use Done Before Anything) [Algebra] Done In Order To Simply, Convolute, Or Control The Whole Ordered Order Of Operations Altogether Potentially Using Multiple = And Endless Expression About All Arithmetic(Stuff Not Involving = But Math Processing To Determine Value) In Algebra, The Process Of Manipulating Both And All Sides Of All Equals(=) To Perform Work.

Trigonometry Is Ratios Of The Length Of The Sides Of A Right (Having A 90 Degree Anotherwords Pi/2 Adjoinment)/Squared Triangle Chugged Into Sin, Cos, Tan, ArcSin, ArcCos, ArcTan To Excrete Results Done Once X Is Computed Such That Sin(x) = Opposite (Side Length) / Hypotenuse (Side Of Triangle Farthest From Right Angel Adjoinment) (Side Length For All Trig (Short For Trigonometry) Operations), Cos(x) = Adjacent / Hypotenuse, Tan(x) = Opposite/Adjacent, ArcSin(Sin(x)) = x, ArcCos(Cos(x))=x, ArcTan(Tan(x)) = x By Reasoned Axiom To Provide Clarity To All Such Expressions And Simplicity To Performing All Such Algebra, Trig, Arithmetic, Calculus(Integrating And Differentiating A Function(Ordered Series Of Operations Like A Side Of Algebra Equation Possibly With Conditions) (f(x) = Any Ordered Set Of Operations-To-Things/Things With Or Without The Variable x Included)) (Integral (f(x)) = Integral Neutralizing Differential Algebraically Of f With Respect To dx (Potentially In f(x) Or Not And Without dx Altogether) (However Without Any Factor Of dx Would Result In A Flat 0 Integral Result) <^ After Thing Represents Getting The Rate Of Increase/Decrease While Integral Symbol Looking Like A Curling / To Neutralize It Or Determine With Extra Variable(s) Notations Start To Finish Of What Is In The () On Respective Integral dx, dy, dz, dt... Attache To Gain Results In Many Dimensions Depending On The Equation WorkUp > 'd' With The Top Line Of The 'd' Character Curling A Lot To The Left When Written Will Differentiate The Thing Directly To The Right Of It Specifically About That Thing Specifically With Nothing Else Changing While A Normal 'd' Just How It Changes With Respect To All Other Things Changeable; 'd' Or Changed Signified By A Delta' Shown As An Upward Pointing Triangle (Not A Downward Pointing Triangle; Gradient, To Dot Product Force As Unit Typed Vector For Divergence Div Which If Cross Product Cur's Movement With Relation Which Integrated To Position Will Provide A Trajectory) Normally Symbolizing A Change Or Level Or Quantity Or Number Of Change (! For Completion Of Sentence .. For Series/Continuation or ... For Indefinite Series/Wait-Till or ... For Infinite Series/Forever) When The Denominator Under The d Thing Factored, Function->Change<df(x) = f'(x) dx> To Get 'd' Thing Has a d The Thing To The Right Of It Is Decidedly The Thing That Changes To Measure Or Metric The Operative System Whether Describing Something Or Manipulating The Math Through Set, Matrix, Descriptors, Calculations Whether/Weather (Bifurcations (Splits In Movement Throughout A Law Field Like In The Supreme Matrix) To Stillness, Movement, And/Or Jumping) From Uniform Or Piecewise (f if Conditions g if Conditions, Calculus Operations Whether Integrating And Both Types Of 'd' differentiation, Algebraic Manipulation, Applied (i) logic, Computational Attempts/Corrections, Manifestation Whether Strange Or Expected, Magic Demonstration, Anything Else Imaginable, & In Theory Anything & Everything Else According To Set Theory, dAn f Causes (Either Curly Or Non Curly dAn To The Thing Differentiated And To The Denoted Denominator Respected) Changing Thing d Thing^n Described Differently Like That For The Respected Change(s) Are Denoted Factored Over And Over Again By An Integer Quantity Rather Than Differentiated Over And Over Because The Differentiation Is Not Applied n Times But Imaginarily (Like Imaginary Numbers: i = (-1)^0.5 => i^2 = -1 For Getting More Quadratic Formula Solutions) Factored n Times Definitely Affecting About Congruency Like Unit Type (Carried) Intervalled Fraction-Like Measurement Appedage For Metricing And Figuring How To Discover/Reapply Formulas To (Re)Determine Equation Work-Up In Modeling Things In Space Equivocated Like Chemistry Equations Where Atoms, Electrons, Nucleons (Protons And Neutrons (Protons With Electrons- To Bond Protons+ Into Atoms Not That Big Because Of Quantum Tailoring)) Are Conserved In NonNuclear Reactions Caused By Heat & Pressure Both With Different Unit Types From Applied Constants That Cause Changes Every Equal Sign In Sequence From Left To Right In Chemistry And In Electronics From - To + Starting With A Teeny-Tiny-Hey-Dhey Time Frame With Everything In The Circuit Having Calculated Inductance As Well With Fanning Out Equations To Calculate The Sub.Cat With Sub.Cortexes Factored Independently) In Science, Arithmetic: A Word Defined To Describe All Math (Manipulation Algebraically Theoretically Happening) Work Proven Through Logic, Thought, Computation, Measurement, Hypothesis; Gussed Definitive Test(s) Of, Theory/Theories Which Is The Basis For Metricing All Science That Describes The Workings Of All Things Tailored Magically To Philosophize All That We Know Into The Set Of Our Understanding (! Neutralizes Function Only And Is Something Entirely Different That Somehow Algebraically Cancels Out The Function As f(x) = x...) No Condition Can Be Uneven About All Sides Of All =, Apply To All Sides, And Cannot In Any Equation Describe A Side Of The = In A Way That Give Privy To (A) Side(s) In-Between(s) Or The Statement Can Become Fallacious (After Getting Most Of This Whole WebPage And Knowing How The Algebra Equations At The Bottom Of This Page Were Manipulated Goto: www.SupremeMatrix.com For Calculus Definition And Demonstrations Or Follow The Links To Gain Insight Into Math/Science/Other) Which Performs A Operation(s) (Chugging Numbers) On A Variable, And Mathematics (Short As Math) Like Performing What Is Most Nested In Parentheses: (! + !) Before Doing Anything Outside Them For Instance (1+2) * 2 = 6 != 1 + 2 * 2. Reciprocal(x) = 1/x. Cosecant (csc For Short) (x) = 1/sin(x), Secant (sec)(x) = 1/cos(x), Cotangent (cot)(x) = 1/tan(x).

$$\sin A = \frac{a}{c} = \frac{\text{side opposite}}{\text{hypotenuse}}$$

$$\cos A = \frac{b}{c} = \frac{\text{side adjacent}}{\text{hypotenuse}}$$

$$\tan A = \frac{a}{b} = \frac{\text{side opposite}}{\text{side adjacent}}$$

$$\csc A = \frac{c}{a} = \frac{\text{hypotenuse}}{\text{side opposite}}$$

$$\sec A = \frac{c}{b} = \frac{\text{hypotenuse}}{\text{side adjacent}}$$

$$\cot A = \frac{b}{a} = \frac{\text{side adjacent}}{\text{side opposite}}$$

$C^2 = a^2 + b^2$, $A + B + C = 360$ Degrees = $2 * \pi$ radians (rad) [Sieradians Are Sphere Mapping Angle * Angel With Units In rad^2 Or Degrees^2 At $4 * \pi$ rad^2 For 720 Degree^2 (By Here-In Defined Axiom For Human Descriptions) Which Is All The Sieradians Of A Sphere Shell In Radians^2 Or Degrees^2 For Mapping Out A Full 3-D Angel Sweep]. $2 * \pi * (r)$ Radius (Center Of Circle To Perimeter (Outer Edges/Length Of Outer Edges) [In This Case Circumference; Circle Line Length] Of Circle) = Circumference (Circle Line Length If Straightened To A Straight Line) Of Circle = $\pi * \text{Diameter}$ (From Circle Circumference Strait Through Center Strait To Other Side Of Circumference Without Bend) = $2 * \pi * \text{Log}_2[\text{Area}[\text{Area}[\text{Flat Land Quantity Same For Surface Area Like Of Sphere (Perfectly Round Ball) Of Circle}] * 2 / \pi]$ [Because Area Of Circle = $\pi * r^2 / 2$ Subscript: Length Unit]^2 (^3 For Volume) ->

$2 * \pi * r = \text{Circumference}$

$r = \text{Circumference} / (2 * \pi)$

$\text{Area} = \pi * [\text{Circumference} / (2 * \pi)]^2 / 2$

$\text{Area} * 2 / \pi = [\text{Circumference} / (2 * \pi)]^2$

$\text{Log}_2[\text{Area} * 2 / \pi] = r = \text{Circumference} / (2 * \pi)$

$\text{Circumference} = 2 * \pi * r$

$\text{Log}_2[\text{Area} * 2 / \pi] * 2 * \pi = \text{Circumference} = 2 * \pi * r$

Get Every Picture Then Click Every Link In This WebPage To Learn Everything. Once

You Get The Fundamentals Behind Calculus From www.SupremeMatrix.com Click [Here](#) For Further (Where $g(x)$ Is Just Another Separate Function.) [Documentation](#) About Further Calculus [Properties](#) To [Meditate](#) On.

After www.SupremeMatrix.com And Maybe Looking Over Other Things For A Bit It Will Be Time For You To [Learn Arithmetic From Wikipedia](#). Once You Have Learned That You Should Find [Class Exercises](#) Online At Everything From Addition To Calculus Till You Can Do Everything Smoothly Without [Reference](#) Hopefully Until You Are [Proficient](#) At Even AP Physics With [This Equation Sheet](#) AS A [Guide](#).

RainbowFirm.com + Pixies.zone/School + MultiColored.css With Diagnostics

By: Alex Beck Private Owner Of The Fwa WebRing

Over 10,000 Lines Of JavaFX Code Of Alex Beck's 30,000 Lines Of Code At This Point In His Lifetime

Color Too Similar Class To Determine When Colors Are Too Similar To Change Them Into A 3rd Color Slider Class To Post-Raster Variate Any 2 RGB Colors. Transparency Color Slider Class To Variate Any 2 ARGB Colors. RainbowSoft Color Class Using CPU Efficient ColorSliders And TransparencySliders To Make Rainbow And Reverse With Green Replaced With Pink To Make Text Apparent When Both Are At Green Or With Black/White Fade In Capable Light And Dark Rainbow Also Has Custom Color[s] Array Input For All Rainbow Classes. With A Huge Assortment Of Vibrant Colors And Easy To Select Vibrant Color Combs Any Browser Text Art Can Be Generated By Selenium Firefox WebDriver To Make Lots Of Rainbow Patterns And Vibrant Seamless Color Changing Fully Customizable Color 2D Transitions.

Rainbow Pattern 2D Class Accessing RainbowSoftColor And RainbowSlider And TransparencySlider To Make All Of The Following Patterns: Separate Classes To With 1 Code Line. Java Code Selection/Index Choice Or Produce 2D Video; Rainbow Flashers, Linear Rainbows, Rainbow Rings/Rainbow Disks, Rainbow Clocks, Rainbow Spirals/Shrunken, Rainbow Strobe, Cheap Rainbow fractal, Rainbow Kaleidoscope/FanOutClock, And Exponential Rainbow. Recently With Post Pattern Firefox Browser Support To Go Online To Any Uniformly Color Schemed/Backgrounded WebPage And Turn It Into Beautiful, Bountifully, Bouncy, Bare Rainbow(s)/RainbowPatterns/Photoshopped-Rainbowed-Graphics-BasisImage Support Along Side Instant White Background, Black, Or Purrly Magenta Text For Making Extensive Rainbow Videos.

RainbowPattern2D.java Has The Ability To Produce [Regular Rainbows + Changing Color Rainbow Segments + Rainbow Ribbons] X [Regular Rainbows + Reverse Regular Rainbows Of The Same Color Scheme + Negative Rainbow Lengths + Double Negative Rainbow Lengths Reversed] X [Moving Color Sliders + Moving Transition Sliders + Doubles Sliders] X [Rainbows + Custom Colors] X [Linear Rainbows, Rainbow Rings/Disks, Rainbow Clocks, Rainbow Spirals/Shrunken, Rainbow Strobe, Cheap Rainbow Fractal, Exponential Rainbow, Rainbow Kaleidoscope/FanOutClock, Rainbow Flasher] X Independent Text/Background Custom ARGB Fade Ins X Any Type Of Browser/Text/Rainbow/Basis Image Selections All Internally, Automatically, And Completely Customizably. Diagnostics For All Systems But Still Potential Glitches And Occasionally Bugs In Java Because Of The Alpha-Like Code Base Now With Pixel Blending To Make Text Rainbow Out Clearly Like In This Java Open Source Video Made By RainbowFirm(F).

Internal Vibrant Colors Arrays, Fully Customizable Invert/Reverse Anything Switch System, Array Reverser, And Array Reverser For Keeping Rainbow Visuals As Clear As Possible, Custom Color Coded RainbowSoft2D ColorChange Schemes, RainbowVideo Control Class, Rainbow System Class, Separate Initializing Setup Class, Making The Software Professionally Fully Modularized As A Hardware Optimized Firmware Development Chassis, Rainbowable/MultiColorVariable Display Rainbow Browser With All Possible Display Types Combinations For All DownGraded Versions Of Compatible Systems For Speed And Efficiency Soon More Rainbow/Video Choices And Later On, Clickable Diagnostics To Choose Rainbows And Eventually Customization. Hopefully One Day Will Even Become A QuantumTailoring.com Modeler Of Anything.

Yes You Need Eclipse IDE To Run It With A Ton Of High End Java Expertise But If You Find Yourself Ready, Capable As A Windows System Administrator And Would Rather Not Have Anything But Free Microsoft Security Than Lose That Status, You Need To Get Up On Tea And Coffee; www.SilkRoadOutPost.com ; Get The www.FountainOfYouth.info Spices And Medicine, And Study In www.Pixies.zone Free Instant Learn Abstract Math/Science School With Alien Propaganda Fwa-WebRing.zip ; www.FreeWorldAlliance.co WebRing Of Currently As Of 2025 AD 71 Domain Name WebRing For Glorious Entertainment, Essential Learning, And Future/Magic Tech/Potions For Becoming An www.ArchWitch.com Under www.SupremeArchMage.com For The www.ViacadEmpire.com

At www.Pixies.zone/School/ Is A Fully Functional Math Educational System To Get Someone From Nothing To Calculus And Beyond With The Links And Arithmetic Link To Wikipedia. All With Special Educationally Supportive Color Coding From Also Provided By The Free World Alliance MultiColored.css In The School's CSS Folder All With Well Checked Diagnostics To Test And Use As Templates For Video Background MultiColored Text Encoding And With Templates For Pixie's Personal's Pages. All FreeWare For Private Use For All Fwa Compliant People Who Wish To Use Free Technology For The Advancement Of The Fwa's Benevolent Goals To Provide More Advanced Constitutional Freedoms Explained At E-Democracy.biz And Under The Leadership Of The Free World Alliance's Protection.
